

In the process of further expansion of our new business establishment in the cologne area we are looking for a

Civil Engineer (m/f/d)

(18136)

Are you ready for a varied range of tasks?

- Specification, monitoring and control of planning services from concept study to execution planning for soil investigations, construction site preparation, supply and disposal systems, pipe supports, process structures (solid construction and steel construction), industrial and non-industrial buildings including their technical equipment (TGA)
- Carrying out inventories
- Independent planning of concepts and drafts for all structural structures in plant construction, including preliminary static measurements
- Preparation of mass calculations and construction specifications
- Evaluation and assurance of project planning with regard to safety, structural fire protection and official environmental requirements, including compliance with specific approval procedures at the customer site and compliance with plant standards
- technical clarification with other departments and the client
- Commissioning of planning services to external engineering offices and their coordination
- technical support for tendering and contracting of construction works to subcontractors
- Coordination of experts such as test engineers, WHG representatives
- Ensuring that projects are completed and reported to the customer on time and within budget

Then show us what makes you special

- Successfully completed studies in civil engineering
- Several years of experience in planning, tendering, awarding contracts and site supervision of industrial plants in the oil and gas industry, taking into account building regulations and building planning law.
- In-depth experience regarding the special features of production sites of the chem. Industry
- communication competence
- Very good knowledge of German and English

What we offer to you

Diverse training opportunities

Flexible working hours

Company doctor

Support with (Child)care

Diversity

Flat hierarchies

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

Have we raised your interest?

Then we look forward to receiving your application by e-mail at karriere@mmecc-mannesmann.com.

Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Ina Riehn on 0211 659 2851.
