

In the process of further expansion we are looking for a

Engineering Manager (m/w/d)

(17050)

Are you ready for a varied range of tasks?

- Assessment of all engineering activities during the project
- Interface management for all engineering disciplines with clients, partners & vendors
- Coordination of the engineering team
- Organisation and leading of the engineering progress meeting
- Management of the project engineering reporting
- Plan & Control of engineering hours
- Coordination of sub-contractors for all engineering

Then show us what makes you special

- Engineering Degree, preferably in mechanical engineering, process or civil
- at least 7 years experience as Lead Engineer or Engineering Manager
- at least 3 year experience on construction sites
- international experience
- teamplayer with very good communication- and leading skills
- very good English and German knowledge
- willingness for assignments abroad

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects.

We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

What we offer to you
