

In the process of further expansion we are looking for a

## Expediter and Logistics Coordinator (m/f/d)

(19104)

### Are you ready for a varied range of tasks?

- Expediting and ensuring on-time delivery of major equipment and materials for EPC/EPCM projects
- Cooperating with our technical departments in order to determine which goods are required in terms of quantity and quality
- Coming up with solutions for budget constraints, supplier errors and diverse challenges as soon as they occur
- To be part of the project procurement team in achieving the targets for all the EPC projects in-line with the company's policies and practices
- Preparation of contracts with forwarders, 3PL or PL companies and export documentation in cooperation with suppliers

### Then show us what makes you special

- Degree in any engineering discipline
- Good English communicator
- At least 5-7 years professional experience in expediting
- Experience in logistics (transportation, controlling of exports)
- Ideally professional experience in the oil, gas, petrochemical or power plant industry
- Willingness to work within different locations in Germany/Europe (Projects)

Have we raised your interest?

Then we look forward to receiving your application by e-mail at [karriere@mmecc-mannesmann.com](mailto:karriere@mmecc-mannesmann.com). Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Antonia Becker on 0211 659 2004.

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
