

In the process of further expansion we are looking for a
Head of Corporate HSE-S & Project HSE-S (m/f/d)
(19057)

Are you ready for a varied range of tasks?

- Management of the Corporate HSE & Project HSE-S division
- Defining, selecting and being responsible for staff and material resources
- Mentoring and organising ongoing training and development of employees
- Identifying and implementing improvements in work processes
- Planning, coordinating and monitoring of all work and processes
- Planning, coordinating and monitoring of safety matters for plant engineering projects in the concept, planning, construction and commissioning phases
- Implementing and maintaining internal company management systems
- Developing programs for occupational safety, health and environmental protection on construction sites
- Storing essential research and development information on process chemistry and its hazards, as a guide for future investigations
- Supervising subcontractors
- Preparing and implementing internal and external training and occupational safety programmes
- Logging and reporting of accident / incident causes and corrective measures as well as other company experiences as a guide for the future
- Creating site-specific specifications and instructions
- Implementing the company's own HSE guidelines and supervising the preparation of project-specific HSE plans and procedural instructions

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

In the process of further expansion we are looking for a
Head of Corporate HSE-S & Project HSE-S (m/f/d)
(19057)

Then show us what makes you special

- Completed engineering, scientific or business studies
- Qualification as occupational safety specialist
- Qualification as safety and health prevention coordinator
- At least 10 years of professional experience in HSE-management in plant construction
- Excellent knowledge of national & international management system standards (e.g. 14001, OHSAS 18001 or DIN ISO 45001, ISO 27001; SCC)
- Qualification as HSE auditor
- Excellent knowledge of applicable laws, regulations (ASiG, ArbSchg, etc.) and DGUV (Deutsche Gesetzliche Unfallversicherung) regulations.
- Ideally qualification as fire safety officer, environmental officer
- Goal-oriented and structured work approach
- Strong sense of responsibility and the ability to engage people with change processes
- Communication & presentation skills within an international context
- Very good written and spoken level both in German as in English
