

In the process of further expansion we are looking for a
Head of Corporate Quality & Project Quality (m/f/d)
 (19057)

Are you ready for a varied range of tasks?

- Coordinating, consulting and monitoring all work done on the construction site
- Participating in the development, implementation and maintenance of safety standards on the construction site
- Revising assembly concepts and hazard assessments as well as complying with the established measures
- Implementing programs for occupational safety, health and environmental protection on construction sites
- Preparing and implementing training and occupational safety programmes
- Creating site-specific standards and instructions
- Participation in investigating the causes of accidents, developing and implementing measures to prevent accidents
- Conducting audits, inspections and tours

Then show us what makes you special

- Ideally an engineer, technician, master craftsman with an additional qualification as an occupational safety specialist or a completed degree in safety engineering
- Further qualifications, e.g. fire safety officer, health & safety coordinator for construction sites, SCC, desirable
- Several years of experience as HSE(AGU) coordinator on construction sites during the construction and commissioning phase
- Flexibility/mobility, willingness to work for several months on our construction sites in the chemical or petrochemical industry
- Very good written and spoken German and English knowledge
- Ideally several years of work experience in occupational safety on construction sites, plant or tank construction

Have we raised your interest?

Then we look forward to receiving your application by e-mail at karriere@mmecc-mannesmann.com. Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Antonia Becker on 0211 659 2004.

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
