

In the process of further expansion we are looking for a

Inspection Manager / Coordinator (m/w/d)

(19237)

Are you ready for a varied range of tasks?

- Ensuring that all Project Procedures required for Project Inspection Management are issued
- Project-specific coordination and guidance of quality planning
- Ensuring that all inspection and test plans are issued prior to inquiry / prior to placement of the PO
- Organising all specified pre-inspection meetings
- Monitoring in close cooperation with the Requisition Owner and Procurement Manager that all documents required for Inspection are issued
- Reviewing and commenting Inspection Documents and ensuring that all documents are of good quality and meet MMEC and the Client requirements,
- Ensuring required inspection visits are scheduled and confirmed with VENDOR
- Reviewing and distributing inspection notifications and following up the completion of all inspection reports, outstanding working lists and non-conformance reports
- Following up, reviewing and distributing inspection reports to the relevant parties, and to highlight any specific action required
- Supporting the PQM to process all deviations with the appropriate engineering departments
- Ensuring that any necessary action has been taken to solve unacceptable deficiencies or that any non-conformance report is closed.
- Providing the Project Procurement Manager all information required

Then show us what makes you special

- Successfully completed studies (TH/FH), in the fields of quality management, mechanical engineering, materials and production engineering, welding engineer
- Ideally NDT qualifications VT, PT, MT RT Level2
- Several years of professional experience in quality management/inspection management of a plant or tank construction company
- Experience in the field of QHSE management in a plant or tank construction company
- Knowledge of EU directives and relevant standards
- Very good knowledge of written and spoken English and German language

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
