

In the process of further expansion we are looking for a  
**Lead Engineer Civil, Structural & Architecture (m/f/d)**  
 (18140)

Are you ready for a varied range of tasks?

- Leadership, responsibility, control as well as staff planning of the CSA project team for the cost- and time-compliant project handling
- Award, supervision and control of planning services from concept study to execution planning for earthworks and civil engineering, solid and steel construction work as well as buildings and their technical equipment
- Consideration of occupational safety, structural fire protection and official environmental regulations within the project
- Supervision and preparation of technical specifications, mass determinations and construction service specifications
- Technical clarifications and coordination with other departments, external engineering offices, subcontractors, experts, test engineers and the customer
- Commissioning of planning services to external engineering offices as well as technical support of invitations to tender and awarding of construction services to subcontractors in German and English language
- Preparation of regular status reports for the project management
- Professional and responsible participation in the preparation of tenders

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

Then show us what makes you special

- Degree in Civil Engineering
- Several years of experience in planning, tendering, awarding contracts and site supervision for Industrial plants in plant construction in consideration of building regulations and building planning law
- Extensive knowledge in the static design of load-bearing structures
- Experience in dealing with the AwSV and a basic understanding of related fields, especially piping, equipment and electrical engineering
- Leadership qualities, sense of responsibility, communication and presentation skills
- Good German and English language skills
- Knowledge of 3D plant design and experience in the field of TGA desirable
