

In the process of further expansion we are looking for a

Pipeline Engineer (m/f/d)

(19089)

Are you ready for a varied range of tasks?

- Developing, planning, designing and calculating pipeline systems and connected equipment
- Designing and planning pipeline routes
- Preparing specifications for pipeline materials/equipment
- Preparation of specifications for pipeline construction, pre-commissioning / commissioning, operation and maintenance.
- Preparing pipeline design dossiers / design reports
- Cooperation in the preparation of technical offers

Then show us what makes you special

- Successfully completed engineering studies, preferably in process engineering / chemical engineering, mechanical engineering, civil engineering or comparable studies
- Professional experience in pipeline engineering and good industry-specific knowledge desirable
- Expertise and experience in the fields of material technology, metallurgy, corrosion and corrosion protection desirable
- Relevant theoretical and practical experience in the application of commercial geoinformation systems (GIS) desirable
- Experience with software tools for hydraulic simulations and/or stress calculations (e.g. PipelineStudio, OLGA, CAESARII, ANSYS) desirable
- Availability to travel for temporary assignments abroad
- Good written and spoken English
- Good German knowledge is advantageous
- Excellent at writing engineering text documents
- Good communication skills, sense of responsibility and reliability

What we offer to you

- | | | |
|--|--|--|
|  Diverse training opportunities |  Flexible working hours |  Perfect connection |
|  Company restaurant |  Diversity |  Company doctor |
|  Support with (Child)care |  Flat hierarchies |  Company sports |

Have we raised your interest?

Then we look forward to receiving your application by e-mail at karriere@mmecc-mannesmann.com.

Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Antonia Becker on 0211 659 2004.

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
