

In the process of further expansion we are looking for a

Construction Supervisor Piping / Mechanical (m/f/d)

(19220)

Are you ready for varied range of tasks?

- Responsible for supervising and coordinating piping/equipment services on construction sites taking into consideration all relevant aspects (contract conformity, quality, technical execution, costs, security, on-time delivery)
- conducting necessary preparations for construction sites in the head office

Then show us what makes you special

- Mechanical engineer or equivalent technical education, additional practical experience is advantageous (e.g. locksmith, welder)
- Many years of experience on plant building in power plant/industrial construction sites monitoring pipeline, machine and equipment installation and supervising subcontractors.
- Very good German & English language skills
- High willingness to travel as the main job tasks take place on construction sites inside the country and abroad

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

What we offer to you
