

In the process of further expansion we are looking for a

## Planning & Scheduling Engineer / Terminplaner (m/f/d)

(19106)

Are you ready for a varied range of tasks?

- Creating time schedules and resource planning for the management and control of projects
- Presenting and analysing the critical trajectory of each project
- Producing time schedules for proposals
- Ensuring compliance with scheduled project goals, adjusting time schedules and producing project reportings
- Contributing to the improvement of time scheduling practices in terms of efficiency, reduction of costs, standard time schedule, analysis of work flow and process chain
- The working premises range from home office to customer facilities or construction sites. Travel availability

Then show us what makes you special

- Experienced scheduler, preferentially with engineering qualification
- Very good knowledge of Primavera and MS Project as well as of its corresponding resource planning
- Knowledge of working procedures in processing plant construction
- Provable working experience as scheduler for projects or customers that are comparable to those of MMEC Mannesmann.
- At least 7 years professional experience in scheduling and resource planning as well as project reporting
- Knowledge of the specifics of "Brownfield" planning
- Preferentially construction site experience, schedulers on construction sites
- Knowledge of scheduling processes for pipeline projects is advantageous
- Preferentially knowledge of schedule database management (system knowledge)
- Language skills: English and German spoken and written

What we offer to you

Diverse training opportunities

Flexible working hours

Perfect connection

Company restaurant

Diversity

Company doctor

Support with (Child)care

Flat hierarchies

Company sports

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

Have we raised your interest?

Then we look forward to receiving your application by e-mail at [karriere@mmecc-mannesmann.com](mailto:karriere@mmecc-mannesmann.com).

Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Ina Riehn on 0211 659 2851.
