

In the process of further expansion we are looking for

## Proposal Manager (m/f/d)

(19114)

### Are you ready for a varied range of tasks?

- Timely and efficient preparation of quotations for the international, European and German market
- Inspection, evaluation and examination of inquiry documents
- Development and presentation of the proposal strategy and structure
- Leading interdisciplinary teams within the framework of bid processing
- Identification of possible cooperation partners and subcontractors
- clarification of technical details, elaboration of special proposals, obtaining offers and price requests
- Independent preparation of quotation texts and corresponding attachments, e.g. time schedules, organisational charts, mobilisation processes
- Presentation of the proposal to the customer
- Handling of smaller projects (e.g. feasibility studies) with the aim of customer retention

### Then show us what makes you special

- Successfully completed engineering studies
- At least 6 years professional experience in the refinery, chemical/ petrochemical or power plant industry
- ideally experience as project engineer or lead engineer
- Very good English and German language skills
- sales-oriented personality
- Ability to work analytically and interdisciplinary
- Independent, committed and diligent way of working

|  Support with (Child)care       |  Flat hierarchies       |  Company sports     |

Have we raised your interest?

Then we look forward to receiving your application by e-mail at [karriere@mmecc-mannesmann.com](mailto:karriere@mmecc-mannesmann.com).

Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Ina Riehn on 0211 659 2851.

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects.

We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
