

In the process of further expansion we are looking for a

Senior Electrical Engineer (m/w/d)

(18069)

Are you ready for a varied range of tasks?

- Full project engineering for the electrical discipline (power systems)
- Preparation of technical material requisitions
- Preparation of specifications and data sheets
- Network analysis and calculations (short circuit, load flow)
- Earthing, lightning protection and lighting systems
- Preparation of consumer and cable lists
- Participation in factory acceptance tests
- Support to the installation and commissioning teams

Then show us what makes you special

- Engineering Degree in Electrical, or Power Systems
- At least 8 years experience as engineer for oil & gas, chemical, petrochemical and/or general industrial sectors
- Extensive knowledge of national and international standards (i.e. VDE, IEC, EN)
- Basic knowledge in ETAP, NEPLAN, AVEVA und Smart Plant welcome
- Teamplayer with very good communication skills, engagement and own initiative
- Very good German and English knowledge

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects.

We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
