

In the process of further expansion we are looking for a

Senior Process Safety Engineer (m/f/d)

(18066)

Are you ready for a varied range of tasks?

- Responsibility for safety-relevant topics in process technology
- Handling of directives and regulations using the HAZID and HAZOP methods or comparable methods for safety consideration
- Documentation of explosion protection concepts (determination of the zone, evaluation of ignition sources)
- Design of systems for active and passive fire protection
- Development of process diagrams
- Definition of escape routes
- Development of R&I flowcharts
- Process engineering design of equipment and instruments
- Creation of data sheets
- Hydraulic design of piping systems

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects.

We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.

Then show us what makes you special

- Successfully completed studies in the field of process engineering or chemical engineering or comparable professional experience (at least 5 years) in the planning of process engineering plants for the chemical and oil processing industry
- Knowledge in the fields of plant safety, safety management and explosion protection
- Knowledge of thermal/hydraulic design of equipment components
- Good written and spoken German and English skills

What we offer to you

Diverse training opportunities

Flexible working hours

Perfect connection

Company restaurant
