

In the process of further expansion we are looking for a  
**Site Quality Manager (m/w/d)**  
(19236)

Are you ready for a varied range of tasks?

- Development of project-related occupational safety and environmental protection programs for chemical/petrochemical industry
- Project-specific coordination and guidance of quality planning
- Examination of technical documents of manufacturers and suppliers with regard to compliance with regulations, welding and materials technology, NDT
- Significant support of the project management in the implementation of our quality guidelines and participation in the elaboration of project-specific quality assurance plans
- Coordination of testing, inspection and acceptance activities, including deployment planning for inspectors within the scope of site supervision
- Creation of project-specific QA specifications and work instructions
- Creation and implementation of training and quality programs
- Execution of internal audits and audits at the involved partners, suppliers including administration of the corresponding documentation (action reports, deviation reports etc.)
- Establishment of continuous quality improvements (Quality Improvement Process)
- Monitoring of the processes according to the quality management system
- Implementation/assurance of customer quality requirements

Then show us what makes you special

- Successfully completed studies (TH/FH), e.g. quality management, mechanical engineering or Material and production engineering
- Several years of professional experience in the quality management of a plant or tank construction company.
- Knowledge of the EU regulations: pressure equipment/machinery directives
- Ideally a qualification as a European Welding Engineer (EWE)
- Ideally NDT qualifications VT, PT, MT RT Level2
- Willingness for national and international assignments
- Very good knowledge of written and spoken English and German language

|  Support with (Child)care       |  Flat hierarchies       |  Company sports     |

Have we raised your interest?

Then we look forward to receiving your application by e-mail at [karriere@mmecc-mannesmann.com](mailto:karriere@mmecc-mannesmann.com). Please send us your complete application documents (cover letter, curriculum vitae, certificates) and your salary expectation.

If you have any questions, please do not hesitate to contact Antonia Becker on 0211 659 2004.

With more than 50 years of experience as a general contractor for the oil & gas (upstream and downstream) and chemical industries, MMEC Mannesmann services cover the entire cycle from early project development, feasibility studies, including hydraulic and case studies, conceptual and basic design, front-end engineering design up to implementation of turn-key projects. We provide our services in respect of process plants for the oil, gas, refining, chemical and renewables industries. We combine technological know-how with the local requirements of your preferred project implementation scheme.
